

# SIP Protocol Evaluation

Rajiv Dharmadhikari

# SIP

- SIP is a protocol for initiating, modifying, and terminating multimedia sessions.
- SIP is a pretty mature, well understood, and frequently used session establishment protocol.
- In addition to establishing sessions, SIP can be used for controlling SPEECHSC resources.

# SIP Protocol Evaluation

- No comments received on the SIP section.
- The approach described in the SIP chapter needs to be validated.

# SIP Protocol Evaluation

- Section 3: Protocol Evaluation Summary (to be completed)
- Section 5.4.5: Grammar Sharing (TBD)
- Section 5.5.3: State for multiple utterances (TBD)
